Summary

Passionate Data Analyst skilled in Excel, PowerBI, SQL, Python with hands-on experience in cleaning, analyzing, and interpreting data to support decision-making.

Skills

Languages	Python, SQL, Core Java, C#, HTML, CSS
Libraries/Frameworks	Pandas, Numpy, Scikit-learn, TensorFlow
Tools/Platforms	Microsoft office, Git/GitHub, PowerBI, Snowflake
Databases	MySQL, MongoDB
Typing Speed	45 WPM with 85% accuracy
Soft Skills	Communication, Problem Solving, Critical Thinking

Education

Kongu Engineering college	MCA	CGPA 8.64	2024-2026
H.H. The Rajah's College	BCA	CGPA 8.98	2021-2024
St. Mary's Hr. Sec. School	HSC	89.97%	2020-2021
St. Mary's Hr. Sec. School	SSLC	85.4%	2018-2019

Projects

E-learning Management System

[View Link](#)

I have developed this website for Enhancing Online Education. This system was designed and developed with **HTML, CSS, JavaScript** for front-end and **PHP and MySQL** for backend development.

ATS Resume Ranker

[View Link](#)

A powerful **ATS (Applicant Tracking System) Resume Analyzer** built using **Python, CustomTkinter, Scikitlearn, and MySQL authentication**. It compares your resume with a job description and provides an **ATS Score, Missing Keywords**, and improvement suggestions.

Exploratory Data Analysis (EDA) on Glassdoor Job Listings

[View Link](#)

Developed an EDA project on Glassdoor job data to analyse job trends, salary patterns, and industry demand using **Python, Pandas, Matplotlib, and Seaborn**. Improved my skills in data cleaning, visualization, and analysis, and generated insights useful for job seekers and recruiters.

End-to-End ETL Automation with Airflow and Python

[View Link](#)

Built an automated ETL pipeline using Apache Airflow to extract data from MySQL, transform it with Python (Pandas), and load cleaned outputs into CSV files. Scheduled workflows (5-min test & hourly production runs) and managed orchestration through Airflow scheduler and web UI.

IBM HR Analytics Employees Attrition Dashboard - PowerBI

[View Link](#)

Performed exploratory data analysis (EDA) on IBM’s HR dataset with 1,470 records and 35 features. Identified key factors influencing employee attrition, such as job satisfaction, work-life balance, and compensation.

Hospital Management System – MySQL & JDBC

[View Link](#)

Built a Java console application using JDBC and MySQL to manage patient records, admissions, discharges, diagnoses, and billing. Implemented CRUD operations across multiple tables with relational database design.

Placement Tracker System – MySQL & Python

[View Link](#)

Developed a desktop-based Placement Tracker System developed using Python (Tkinter) and MySQL to manage student placement records. It supports CRUD operations, search, filters, and CSV export functionality with a clean user interface.

Certificates

Certified in Data science for Engineers	NPTEL	2025
Certified in Oracle Analytics Cloud Professional	Oracle University	2025
Certified in Oracle MySql Implementation Associate	Oracle University	2025
Certified in Databases and SQL with python	IBM Via COURSERA	2025
Certified in Data Analyst	NOVITECH	2024
Certified in Python Programming	UDEMY	2024

Extracurricular Activities

- **Coding Club Member** MCA Department, Kongu Engineering College Erode [Aug-2024]
- **Association Club Member** MCA Department, Kongu Engineering College Erode [Sep-2026]
- Intra college competition (**Paper Presentation**)-won 3rd price [Sep - 2024]

Internship Experience

Data Analyst with AI Intern

Labmentix Edtech Pvt. Ltd. | Feb 2025 – May 2025

- Analysed and processed large datasets using Python (Pandas, NumPy) and SQL to extract meaningful insights.
- Performed data cleaning, transformation, and preprocessing to ensure data accuracy and reliability.
- Developed AI-driven analytical models to identify trends, patterns, and business opportunities.
- Utilized Matplotlib and Seaborn to create in-depth exploratory data analysis (EDA) visualizations.
- Extracted, analysed, and visualized key business metrics, providing actionable insights for stakeholders.
